## 6060 Light Iron & Non-Ferrous Shredder

The 6060 Shredder by **WENDT** has a uniquely engineered economical and efficient design that offers a small footprint and a low cost of ownership.

- Estimated capacity: 3,000–5,000 input net tons per month \*Based on 8 hours x 21 days
- Standard Drive Packages: 1,000-1,250 HP
- **Typical Feedstock:** Light Iron, White Goods, Aluminum, Copper, Motors and Meatballs, Rims and Extrusions

- Precision-engineered Bowe low maintenance DISC Rotor for performance and increased durability
- Optimized shredder geometry for maximum throughput for the available HP
- Top and bottom discharge to maximize open area for optimal shredding efficiency
- Designed to operate at the **lowest cost per ton** in its class size
- Advanced hydraulic system with IoT Sensors for remote diagnostics, tracking and smart water injection
- **State-of-the-art control system** with **WENDT** AutoDriver for automatically controlling infeed conveyor and feed rolls and maintaining maximum performance
- Designed for shipping Minimize total project cost with the ability to choose final assembly methods to minimize shipping and/or on-site assembly costs

## 6060 Shredder Installation Configurations

**WENDT CORPORATION** is a world leading provider of completely integrated scrap processing systems. Beyond our extensive equipment portfolio, **WENDT's** in-house team of engineers, project management, sales and service help us to deliver unique value and a competitive advantage to our customers. The combination of our proven equipment, processes and innovative technologies are what make **WENDT** a world-class recycling equipment provider.

#### WENDT offers Stationary and Modular Installation Configurations that are tailored to meet the needs of our customers and their specific markets.

- Static Configuration
- Designed for 20–30 input TPH \*based on selected drive
- Requires permanent building for installation & protection of critical equipment
- Requires above-grade concrete piers for support of shredder
- Lowest capital equipment cost with higher total installed cost
- Ideal for existing shredders looking to upgrade

### M6060 (Modular)

- Modular Configuration
- Designed for 20–30 input TPH \*based on selected drive
- Includes pre-wired & plumbed components for faster installation
- Modular houses protect critical components, eliminating need for permanent building
- Structural steel supports replace the need for above-grade concrete piers
- Higher capital equipment cost with lower total installed cost (market dependent)

# 6060 Shredder Specifications

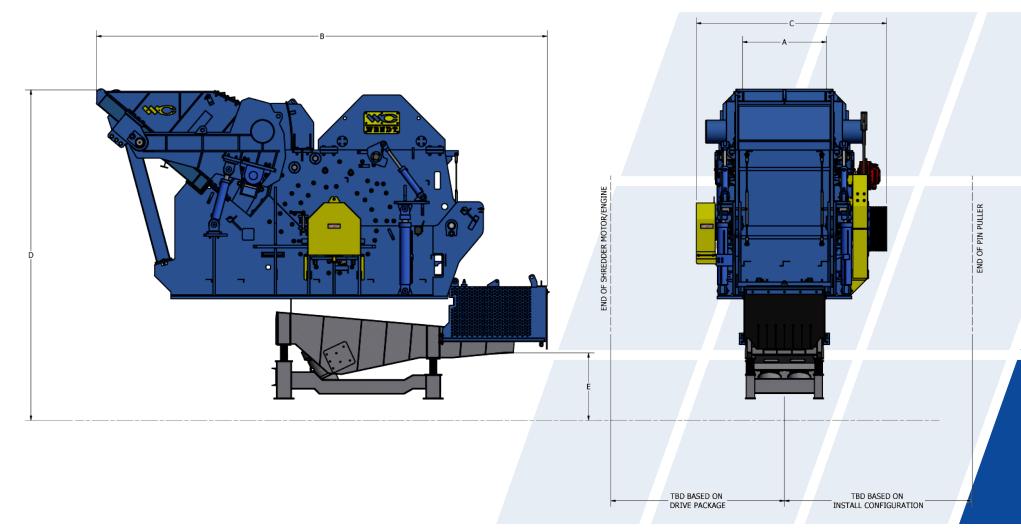

SPECIFICATIONS		PRIMARY D
Rotor Type:	Disc	
Rotor RPM:	675 RPM	
Hammer Swing:	62 <sup>3/4</sup> in (1,594 mm)	Input
Hammer Weight:	232 lbs (105 kg)	Input
Bearings:	220 mm	(160
Installed Fluid Power:	100 HP	Out
Single Feed Roll:	Single CA-140	Scrap D

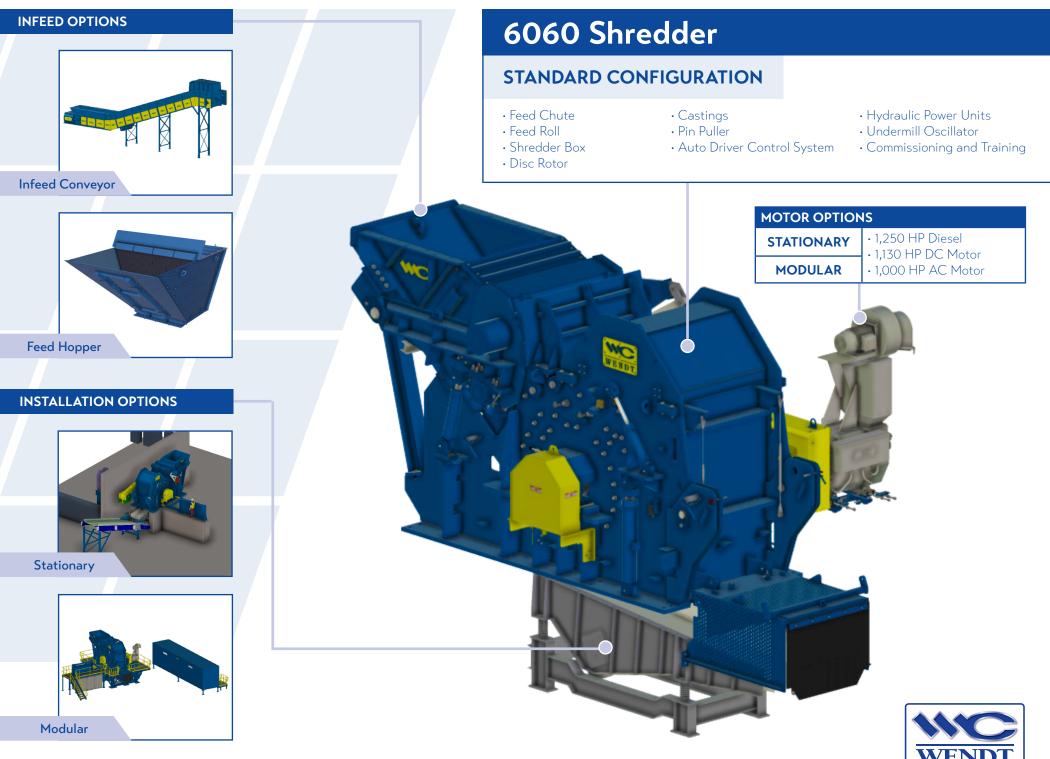

PRIMARY DRIVE OPTIONS			
	1,000 HP ELECTRIC	1,250 HP DIESEL	
Input TPH	25	20	
Input TPM (160 HRS)	4,000	3,200	
Output Scrap Density	75–95 lbs/ft³ (1.2–1.5 T/m³)		

DIMENSIONS	
Working Width (A):	57 in (1,448 mm)
Overall Length (B):	312 in (7,925 mm)
Overall Width (C):	132 in (3,353 mm)
Overall Height (D):	226 in (5,740 mm)
Feed Height (E):	46 in (1,168 mm)

\*Dimensions do not include drive components or pin puller as these will vary based upon final selection.
